

ZOHO - Authentication

NOTE: Ensuring the accuracy of these parameters is essential for the seamless functioning of the payroll connection. Please share the requested details for a smooth integration process.

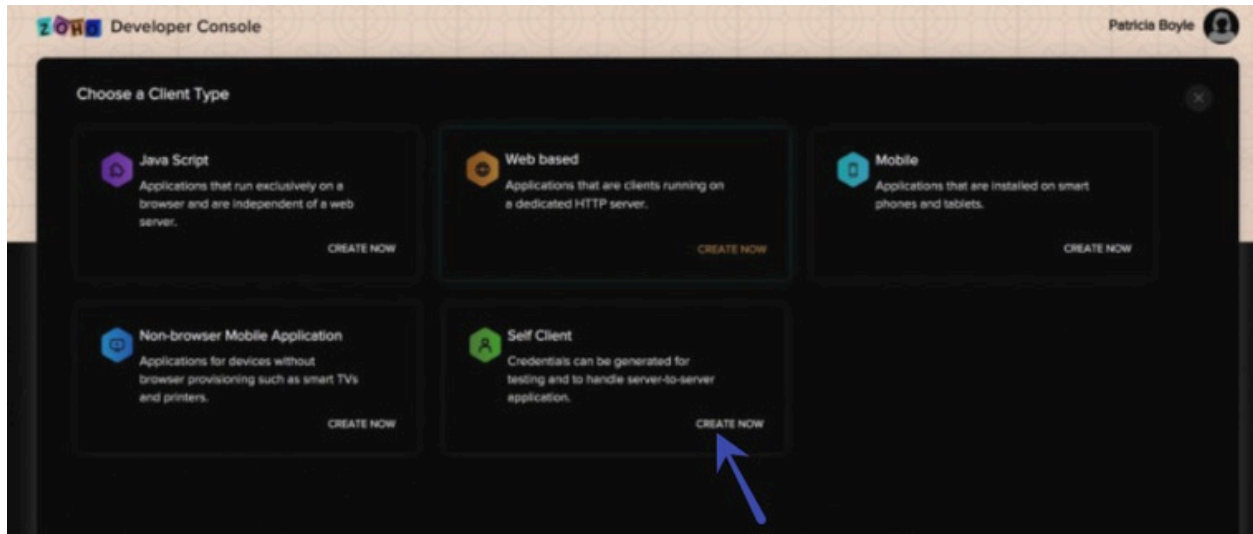

To establish a payroll connection, the following parameters are required:

1. Data Center
2. Client ID
3. Client Secret
4. Code

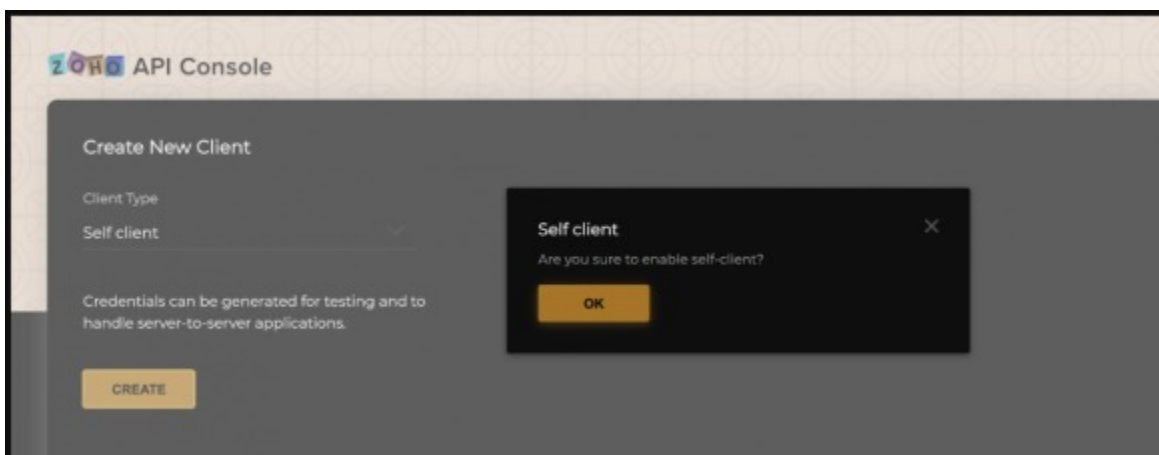

Data Center: Specify the data center location using 'in' for India-based companies and 'com' for US-based companies when indicating the domain extensions.

Generating Client ID, Client Secret and Code :

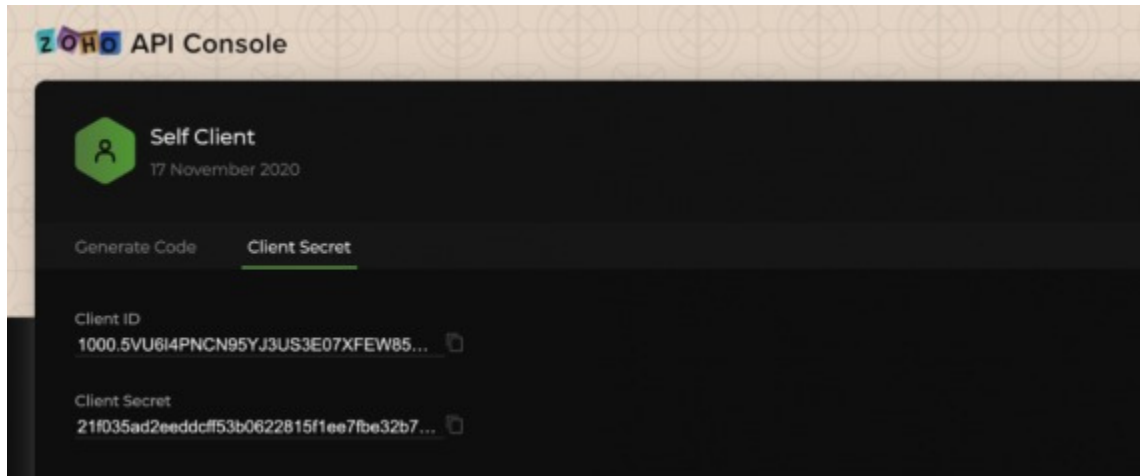

1. Visit the [Zoho Developer Console](#) and Sign-in to the portal.
2. Select "Self Client" from the list of client types, and click "Create Now."

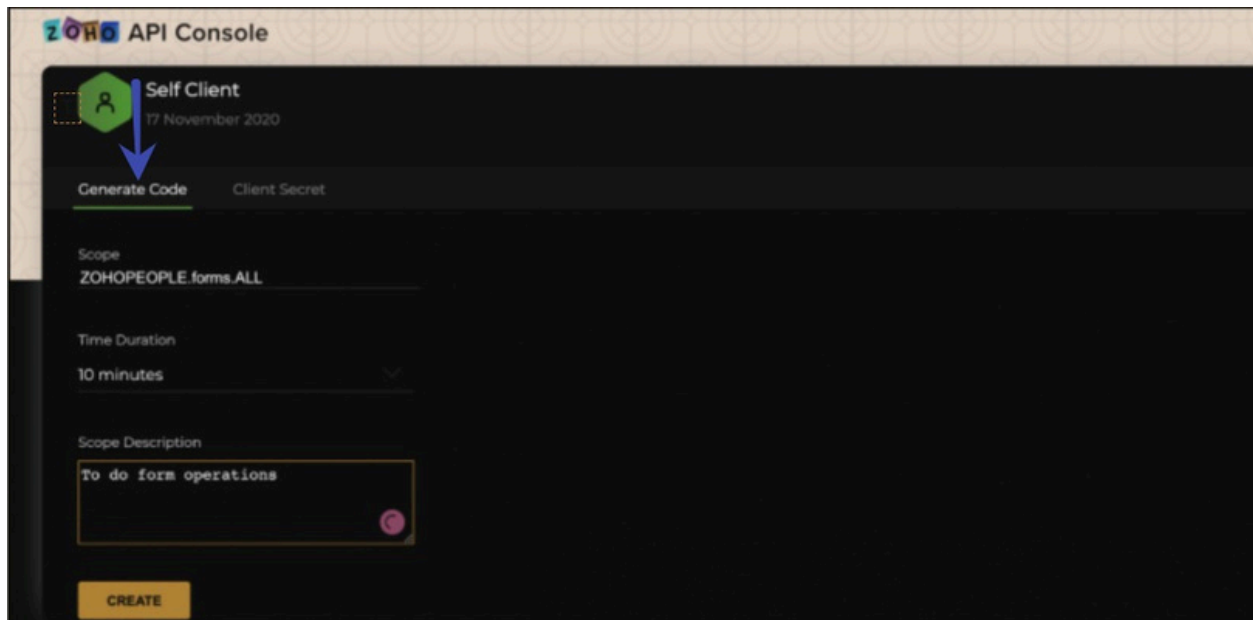

3. Click "OK" in the popup to activate a self client for your account.

4. Your client ID and client secret are now visible under the Client Secret tab.

5. Click on the "Generate Code" tab (under self client), and enter the necessary scope separated by commas. For Zoho People API, use the scope "ZOHOPeople.forms.ALL".
6. Choose the time duration for the validity of the grant token. It's important to note that the grant token will expire after this specified period.
7. Enter a description for your understanding and click "Create".

8. After clicking "Create," you'll see the organization-specific grant token code for the specified scope. Copy this grant token (code) for your records.
9. Once you've generated a new grant token (code), you'll have all the necessary parameters to establish a connection. Paste these parameters into the the console and give your consent to terms and conditions for a successful connection.
